

1. ALL SAFE WORKING LOADS INDICATED ARE FOR THE CONNECTION CAPACITIES TO THE BLOCKS ANCHOR SYSTEMS. THIS DESIGN DOES NOT ACCOUNT FOR GLOBAL STABILITY SHOULD BE CHECKED BY THE DESIGNER FOR THE APPLICATION BEING CONSIDERED.
2. A SAFE SYSTEM OF WORK SHOULD BE IMPLEMENTED BY THE CONTRACTOR FOR INSTALLATION OF THE BLOCKS. THE BLOCKS SHOULD ONLY BE LIFTED BY FORKLIFT LIFTING POINTS AND BY HALFEN SPHERICAL HEAD LIFTING ANCHOR SYSTEM.
3. GROUND CONDITIONS SHOULD BE CONSIDERED FOR EACH APPLICATION AND SHOULD BE CHECKED BY OTHERS.
4. ANCHOR BLOCKS SHOULD BE INDEPENDENTLY INSPECTED ON A WEEKLY BASIS, IN THE EVENT OF EXTREME CLIMATIC CONDITIONS AND PRIOR TO USE.
5. WRITTEN DIMENSIONS SHOULD TAKE PREFERENCE OVER SCALED DIMENSIONS.
6. ALL DIMENSIONS IN MILLIMETERS UNLESS OTHERWISE STATED.
7. THIS DRAWING IS TO BE READ IN CONJUNCTION WITH ANCHOR BLOC APPLICATION DESIGN AND SPECIFICATION.
8. ALL PROPRIETARY ITEMS TO BE INSTALLED IN STRICT COMPLIANCE WITH MANUFACTURERS INSTRUCTIONS AND RECOMMENDATIONS.

- INHIBITS AND CONTROLS THE FORMATION OF INTRINSIC CRACKING IN CONCRETE
- REINFORCES AGAINST IMPACT FORCES
- REINFORCED AGAINST ABRASION
- REINFORCED AGAINST THE EFFECT OF SHATTERING FORCES
- REINFORCES AGAINST WATER MIGRATION
- PROVIDES IMPROVED DURABILITY
- REDUCES PLASTIC SHRINKAGE AND SETTLEMENT CRACKING

A diagram of a rectangular block with a circular hole. The block has a height of 30 and a width of 240. The hole has a diameter of 180.

Technical drawing of a mechanical part. The part has a square outer profile with a side length of 240. The top and bottom edges feature a chamfer with a 45-degree angle. The horizontal dimensions are: 75 (left), 90 (center), and 75 (right) for the top edge; and 60 (left), 120 (center), and 60 (right) for the bottom edge. The vertical dimensions are: 30 (top flange thickness) and 240 (main body height). The part is shown with a cross-hatched pattern indicating a specific material or section.

Technical drawing of a mechanical part. The part has a square outer profile with a side length of 240. The top and bottom edges feature a chamfer with a 45-degree angle. The top edge dimensions are 75, 90, and 75. The bottom edge dimensions are 60, 120, and 60. The total height of the part is 240, and the total width is 240. The part is filled with a stippled pattern.

**MATERIALS**  
All materials shall be in good condition showing no signs of defects. The design is based on the materials being of quality products closely controlled to ensure they are free of defects. All subcontracted members should have a manufacturers identifier and should be in good condition showing no signs of defects.

**DESIGN**  
All written dimensions should take precedence over coded dimensions. Any dimensional discrepancies on the design should be notified to Greater Ltd. It is the responsibility of the Scaffold Contractor and the Scaffold Contractor to ensure the scaffold is set out correctly and in accordance with the design.

**PERMITS AND PERMISSIONS**  
It is the responsibility of the Principal Contractor/Scaffold Contractor to obtain all permits and permissions prior to erection of the scaffold.

**REPAIRS / MODIFICATION**  
This document remains the exclusive property of Greater Ltd and should be returned immediately upon request. Modification or alteration should be made to the design without written permission from Greater Ltd.

**IMPOSED LOADS / VARIABLE ACTIONS**  
Duty of Block = 500kg anchor bloc self weight
